Your company is responsible for the accuracy and completeness of the information shared.

The safety data sheets or the medical data sheets of the company will be stored in VIZ's own database. The VIZ Poisons Information Centre maintains a database on safety data sheets (SDS), and has access to a large number of other toxicological and chemical databases from Austria and abroad, which constitute the basis for its 24-hours emergency service.

In case of **new** products or any **changes** to existing products, the company has to send **updated** safety data sheets immediately to the VIZ Poisons Information Centre (VIZ@goeg.at). In order to provide you with the best possible service, we rely on having your safety data sheets up to date at all times.

3. Reimbursement

For the service specified in item 1, the VIZ Poisons Information Centre will be reimbursed, on an annual basis, for the costs incurred, dependent on the number of products for which the VIZ Poisons Information Centre is named as an emergency contact point in the safety data sheets.

The reimbursement rates are shown in the following table. The rates listed are subject to 20% VAT. The reimbursement rates will be adjusted to cover annual inflation (based on the Austrian consumer price index).
