Selected comments from Dimension 1

The organization is committed to implement health promotion as part of their overall strategy.

“I would add citizens participation as third bullet in order to guarantee a stronger participatory approach even in HP planning. “

“The extent to which resources are made available for health promotion should be addressed, either through dedicated budgets or through reference to health promotion being an integral part of organizational policies.”

“I would consider adding #3. Organizational Support Structures. You need not only the policies that leadership establishes around health promotion and mechanisms to measure performance, but identification of the structures within the organization through which the policies are operationalized.”
